400	Carolyn Wells	Patty's Suitors		<a href="http://www.guten1.org">http://www.guten1.org</a>	gutenberg	1914	Lit	mid	PD	When the young people returned to the ballroom, it presented itself as a picture of beauty. The floor was covered with snow-white canvas, not laid down, but suspended from the ceiling by ropes. At each end of the room, on the wall, hung a beautiful blue rug. These rugs were for prizes, one for the girls and one for the boys. The girls were gathered at one end of the room and the boys at the other. This would have been an easy matter, but each traveller	174	11	-0.340259125	0.464009046	81.7	5.95	7.37	8	6.55	0.12102	0.45753352	12.0978155		
401	Carolyn Wells	Two Little Women on a Holiday		<a href="http://www.guten1.org">http://www.guten1.org</a>	gutenberg	1917	Lit	mid	PD	All through dinner time, Mrs. Fayre was somewhat silent. At last, however, when the meal was nearly over, she said, "Oh, mother!" Dolly cried, overwhelmed with sudden delight. "Oh, I am so glad! Are you sure you're willing?" "I've persuaded myself to be willing, against my will," retorted Dolly. "Oh, you angel mother! You blessed lady! Sleigh	Children crossing African Storybook		<a href="https://www.africanstorybook.org">https://www.africanstorybook.org</a>	africanstorybook.org	2020	Lit	start	CC BY 4.0	Lizzy lived next to a busy road. She would often sit outside and watch the traffic go by. Full taxis carried people to work. Children passed on the way to school. Lizzy also liked to watch the insects as they crawled and飞舞. Sometimes Lizzy nibbled on the sour flowers that grew under the trees. One day, Lizzy saw two girls on the other side of the road. Mamma always told Lizzy, "Before you cross any road, look both ways." Finally, there was a gap between the cars. The one girl said, "Come on Mosa, quickly before the next car!" shouted the other girl.	169	16	-0.517665608	0.504310366	84.61	3.93	3.98	6	5.9	-0.00071	0.38865487	20.5302831

2166	Juvena Jalal	The Mighty Tethys Sea		<a href="https://freekidsbooks.org">https://freekidsbooks.org</a>	freekidsbooks	2020	Info	mid	CC BY 4.0	Fossils are the preserved remains or traces of a living organism. This is the fossil of a creature called an ammonite. Ammonites are ancient marine animals that lived millions of years ago. Paleontologists and archaeologists are scientists who study fossils. To answer this question, we have to go back a hundred million years. Just beneath the surface of the continents and the sea sediment, there are still a lot of mysteries about how and why some organisms became fossilized. Scientists compared the genes from several different species of ammonites to see if they were related. Researchers can also use MRI to see how the brain is organized. Typical behaviors that we see during adolescence, such as risk-taking and thrill-seeking, are controlled by the prefrontal cortex. Beyond its obvious importance in everyday life, it turns out that the Prussian king Frederick the Great was a fan of chess. The Kingdom of Prussia (German: Königreich Preußen) was one of the most powerful countries in Europe during the 18th century. Unfortunately, like many other big crops, growing a lot of grain requires a lot of water. Laws have been set to limit the amount of forested areas that can be cleared. Also, growers who are members of an organization called the World Bank are required to plant more trees. Many scientific studies have found that, after making a new friend, people feel better. Some people have a larger ERN than others. Does this mean that some people are more social? Having a strong ERN is not necessarily always a good thing. The Korean War was a war fought in Korea between North Korea and South Korea. Both sides blame each other for starting the war. The war did not end but a ceasefire was put in place. So, what happened to Jordan? On Monday morning, your friend Jordan walks up to you and says, "I'm sorry, I'm late." But after class, you again run into Jordan, who has apparently forgotten about the meeting. Kristin A. Camen	195	14	-1.052453379	0.465720489	71.88	6.73	7.24	9	7.54	0.16843	0.58103283	18.1888270

2363	Sam Rosenberg Sue Ishaq Julia May	Ashkaan K. Fahri	How Light Exposure Changes Bac	<a href="https://kids.frontiersin.org">https://kids.frontiersin.org</a>	kids.frontiersin	2020	Info	mid	CC BY 4.0	One thing that might affect indoor microbes is exposure to light. From what was already known about the way light affects skin, it was surmised that if a person is allergic to something, a medical test like a skin-prick test, the doctor or nurse puts tiny amounts of the allergen on the skin. If you have a positive allergy test, and you know which allergies you have, you can avoid those things. The ocean covers more than 72% of the Earth's surface. Oceanographers (scientists who study the ocean) use A scanning electron microscope (SEM) is a type of electron microscope that uses a beam of electrons to image a sample. If someone is in water, you can use a stick to pull them out. After a night of heavy rain, a group of friends were on the beach. They came to the river they had to cross every day. "Yoh 'Oh no," groaned Linda. "Do you think teacher will be angry?" Linda remembered what the Sea Rescue instructor had taught her: "Never cross a flooded river. Even if you can't get to shore, stay dry." Meanwhile, Lungi stepped straight into the river! "I know he's not going to drown," thought Linda. "But he soon fell into the water and the strong river began to pull him under. 'Run and get help!' shouted Linda. "Tell them to call the coast guard!" "Help, help!" shouted Lungi as he struggled to keep his head above water. "Hold on, Lungi!" shouted Phelelani, as he grabbed a branch from a nearby tree. Johnny is late to meet his friends to go fishing. When he arrives at the beach, he realises that he's forgotten his fishing rod. Because he's been fishing for years, Johnny knows the right place to fish. "Right!" he says, "it's on firmly and I'm ready to go!" On the ocean, they find a good spot to fish and put down their rods. The boat is turned upside down and the men are flung into the water. "Eeeeeehhh!" they yell as they are plunged into the icy water. Not all of them can swim but, luckily, they are all wearing lifejackets. Sea level is generally used to refer to mean sea level (MSL). Sea levels can be affected by many factors and are known to change over time. Chalk, limestone, and dolomite are all basically made from calcium carbonate. Some sedimentary rocks are made of just one type of sedimentary rock. Sedimentary rocks may be found anywhere on Earth. While some sedimentary rocks are made of just one type of sedimentary rock, others are made of many different types. You probably like bees: they are cute and fuzzy, and they help pollinate flowers. The Seven Years' War was a world war fought between France and Britain. Why do animals put their energy into making light? One reason is that they need light to see. The Silk Road derives its name from the lucrative silk, gold, and silver trade that took place along its route. Iron is smelted from iron ore in large reactors called blast furnaces. Aluminum is smelted in electric ovens called electric arc furnaces. Copper is poured on naked flame which burns off sulfur and other impurities. We have all experienced a wound, a local injury to the skin. Every society is different, the way it breaks down a society. Society is the term to describe human beings together (communities). Because it must keep even the poorest and weakest members alive, it must provide for their basic needs. As Socrates did not write down any of his teachings, we must rely on Plato and Xenophon's dialogues to provide the main source of information about his philosophy. For discovering the real-life Socrates, the difficulty is that he lived a long time ago and there is little written evidence. Computer software (often called just software) is a set of instructions that tell a computer what to do. Software as a Service (SaaS; pronounced /sæəs/) is a software delivery model where software is provided over the internet. According to a Gartner Group estimate, SaaS sales in 2010 were \$15 billion. Software development is the process of creating computer programs. When the first digital computers appeared in the early 1950s, programming languages started to appear in the early 1960s. The origins of the term "software engineering" have been traced back to the 1960s. Solar sails (also called light sails or photon sails) are a form of sail that uses the pressure of sunlight to move. Solar sail craft offer the possibility of low-cost operations in space. The Solar System is the Sun and all the objects in orbit around it. The Sun is a star. It contains 99.9 percent of the Solar System's mass. There are eight planets in the Solar System. From closest to furthest from the Sun, they are Mercury, Venus, Earth, Mars, Jupiter, Saturn, Uranus, and Neptune. The solar wind is a stream of charged particles released by the Sun. Solubility is the property of a solid, liquid, or gaseous substance to dissolve in a solvent. Most often, the solvent is a liquid, which can be a pure substance or a mixture. The Soviet Union (short for Union of Soviet Socialist Republics) was created after Vladimir Lenin led the October Revolution in 1917. Special effects is a term for the things used in movies to create images. Action movies often use special effects to create images that look like they are happening in real life. Science fiction movies also often use special effects. The term "special effect" is often used to refer to the visual effects used in movies, such as computer-generated imagery (CGI), practical effects, and practical effects.	165	7	1.804345137	0.509829835	51.28	12	13.53	14	9.47	0.1878	0.50439118	15.144073

For discovering the real-life Socrates, the difficulty is that he lived a long time ago and there is little written evidence. Computer software (often called just software) is a set of instructions that tell a computer what to do. Software as a Service (SaaS; pronounced /sæəs/) is a software delivery model where software is provided over the internet. According to a Gartner Group estimate, SaaS sales in 2010 were \$15 billion. Software development is the process of creating computer programs. When the first digital computers appeared in the early 1950s, programming languages started to appear in the early 1960s. The origins of the term "software engineering" have been traced back to the 1960s. Solar sails (also called light sails or photon sails) are a form of sail that uses the pressure of sunlight to move. Solar sail craft offer the possibility of low-cost operations in space. The Solar System is the Sun and all the objects in orbit around it. The Sun is a star. It contains 99.9 percent of the Solar System's mass. There are eight planets in the Solar System. From closest to furthest from the Sun, they are Mercury, Venus, Earth, Mars, Jupiter, Saturn, Uranus, and Neptune. The solar wind is a stream of charged particles released by the Sun. Solubility is the property of a solid, liquid, or gaseous substance to dissolve in a solvent. Most often, the solvent is a liquid, which can be a pure substance or a mixture. The Soviet Union (short for Union of Soviet Socialist Republics) was created after Vladimir Lenin led the October Revolution in 1917. Special effects is a term for the things used in movies to create images. Action movies often use special effects to create images that look like they are happening in real life. Science fiction movies also often use special effects. The term "special effect" is often used to refer to the visual effects used in movies, such as computer-generated imagery (CGI), practical effects, and practical effects.	196	17	-0.277003805	0.522123426	65.03	7.11	7.22	10	7.77	0.22538	0.66497486	15.723178

2512		The SubCAS: A Pressure Chamber		<a href="https://kids.fronti">https://kids.fronti</a>	kids.frontiersin	2019	Info	start	CC BY 4.0	Coral reefs are marine ecosystems found in tropical regions. Years ago, a group of horned animals decided to have a party. They only invited other animals with horns. No one else. When the pig heard about the party, he thought, "I don't have any horns." The next day, he had an idea. He'd stick some horns to his head. It worked, and the pig felt very clever when he was allowed to join the party. The problem was that the party was taking place close to the beach. When the party started heating up, the wax began to melt. The horned animals were shocked. "Who's that one with the horns?" The king of the horned animals commanded, "Grab that pig!" So all the animals, when they heard the king's words, did what they were told. They grabbed the pig and threw him down to earth. Poor pig! When he fell, he landed on his nose. And his nose bled. Their job done, all the other animals returned to the party. They ate and danced all night.	190	10	-1.11387308	0.473499718	52.64	10.64	10.99	11	9.48	0.21557	0.62051870	9.59776810

If it is underexposed, it will be too dark.	164	13	1.145677378	0.531263722	82.77	4.89	4.59	8	5.51	0.0991	0.41044217	31.7523140
2678	Pimville Library	Sibusiso, the evil African Storybook		<a href="https://www.afric">https://www.afric</a>	africanstorybook	2019	Lit	start	CC BY 4.0	There was an old lady with a stomachache. A fairy flew by and stopped to ask why the old lady was crying. "I have a terrible stomachache," she wept. "Can you help me?" The fairy said "No, I can't help you. I'm Sibusiso, the evil spirit." "Then please, go away," said the woman. With an evil chuckle, Sibusiso disappeared. (He became invisible.) The old lady rubbed her stomach. Before long, another fairy arrived. This fairy, named Khumo, also asked what was wrong. "My stomach is sore!" moaned the old woman. Khumo responded, "I can help! I will make some medicine for you." Invisible Sibusiso was watching. He used his magic to send Khumo to the future. The old lady was surprised and looked around. She couldn't see anyone. She wondered what had happened. The old lady started moaning again. A third fairy flew past and asked her what was wrong. "I have pain in my stomach!" she cried. The old lady was losing patience with the fairies. Without waiting for the third fairy to reply, Sibusiso sent his magic to the old lady's stomach. Sibusiso started giggling. The old lady heard him.	197	30	0.700117443	0.540726656	78.41	4.01	2.24	7	6.38	0.11794	0.59793367	32.2563020
2679	simple wiki	Postmodernism		<a href="https://simple.wik">https://simple.wik</a>	simple.wikipedia	2019	Info	start	CC BY-SA 3	Postmodernism is a way of thinking about culture, philosophy, and art. Postmodernism says that there is no real truth. It says that there is no single reality. Since postmodernism says that the truth is just a thing that we create, it means that there is no one true way of looking at the world.	174	9	-0.584382693	0.476608594	68.22	8.09	9.29	10	5.95	0.10147	0.45463524	27.9437033

2752	Ben Silvnick	The Story Behind CLD		<a href="https://www.com">https://www.com</a>	commonlit	2018	Info	mid	CC BY-NC-S	Today, scientists still aren't exactly sure why we have dreams. Another theory says that dreams play an important role in our health and well-being. On Sept. 17, 1787, the U.S. Constitution was submitted to the states for ratification. But there was a problem. There was no vision for how the new government would treat individual rights. These natural rights became the Bill of Rights, which was added to the Constitution in 1791. The Bill of Rights included a wide range of protections, from freedom of speech and religion to protection from unreasonable search and seizure.	189	9	0.616621331	0.530012022	62.51	9.78	12.64	10	8.09	0.14547	0.60745736	21.6682452		
2753	Ben Silvnick	The Bill of Rights CLD		<a href="https://www.com">https://www.com</a>	commonlit	2018	Info	mid	CC BY-NC-S	The First Amendment protects freedom of religion, the freedom of speech, the right to assemble, and the right to petition the government. It also protects the right to bear arms. The Bill of Rights includes provisions for due process, protection from unreasonable search and seizure, and the right to a trial by jury.	162	7	-0.181617824	0.467047827	52.43	11.87	13.63	14	9.45	0.15581	0.50508948	13.1151938

3692	The Barre Daily	Was Hard Fight	CLD	<a href="https://www.commonlit.org/">https://www.commonlit.org/</a>	commonlit	1920	Info	mid	PD	The 19th amendment, which bears her name, was drafted "Article—, Section 1. The right of citizens of the United States to vote shall not be denied by any State on account of race, color, or previous condition of servitude. Section 2. Congress shall have power, by appropriate legislation, to enforce this article." The amendment holds the record of being before the committee for the longest time. During the first 33 years after its introduction into Congress, it was referred to the Committee on the Judiciary 17 times, and to the Committee on House Rules 10 times. It was never voted on by either house.	182	9	-1.086324845	0.481366434	55.43	11.3	12.27	14	9.46	0.20289	0.56283645	11.8070210

Some one has come to the aid of the bicyclist, and invented another busy brain has been at work in anticipation of the umbrella support is the result. It consists of an attaché case What a boon it will be, on a hot summer's day, to have air	150	6	-0.899950808	0.452308672	55.69	11.7	12.2	12	8.88	0.20378	0.38424447	5.90483071
4673	William Beverley	Invention and Dis	The Great Round	<a href="http://www.guten">http://www.guten</a>	gutenberg	1897	Info	end	PD	All March 4th, William McKinley was duly inaugurated as President. For once the weather was perfect, and everybody was in high spirits. Here he was received by Mr. Cleveland, who up to the very last moment had been the favorite. The members of Mr. Cleveland's Cabinet also came to pay their respects. As they passed down the steps through the crowd that was gathered, the state carriage, drawn by four horses, was waiting for them. The state carriage, drawn by four horses, was waiting for the side which "calls" takes all of the States in a box.	163	8	-0.835897448	0.519656386	71.71	8.47	9.21	10	6.75	0.06562	0.41768260	16.0311541
4674	William Beverley	The Inaguration	The Great Round	<a href="http://www.guten">http://www.guten</a>	gutenberg	1897	Info	mid	PD	At last we seem to have a mucilage brush that is going to do. We have had them in plenty with the handles so arranged that the new brush is so arranged that it does not touch the bicycle-tape, and the mastic, and the dozen other details. A punctured tire is a wounded tire, and needs the aid of a leak-stopper. The leak-stopper is merely a bandage to be applied to the strap. On the inside of the strap is some flexible air-tight material. The edges are covered with adhesive material, and are fastened to the bicycle-tape, and the mastic, and the dozen other details. An inventor in Boston has just perfected an excellent coat-hanger. At the first glance it looks like the ordinary hangers we have in our houses. Those who live in small houses or apartments with meagre resources will find it a great convenience. The new hanger is adjustable. Its arms work on a spring.	175	8	-0.522537934	0.496840771	60.94	10.38	10.71	11	7.2	0.0677	0.41675656	15.5957135
4675	William Beverley	Juno	The Great Round	<a href="http://www.guten">http://www.guten</a>	gutenberg	1897	Lit	mid	PD	Juno was about a year older, I think, when there was a quarrel between her and her husband. But Juno would not be reconciled. She dropped around a game that may be played by four, six, or eight players. This game is played with a map of the United States made in the shape of a box. This map should be large enough to have Rhode Island in the middle. The side which "calls" takes all of the States in a box.	178	11	-0.313097629	0.450820105	78.78	6.31	6.08	8	6.83	0.14439	0.38499898	14.8930896

5034 ?	MOIST AIR IN LI	Scientific Americ	<a href="http://www.guten">http://www.guten</a>	gutenberg		1883	Info	end	PD	He arrived at the following results, which are of decided interest: 1. When large and small open vessels filled with water are placed in a room 2. Tubs of water of the same temperature as the room are suspended over 3. When hot air is used, open vessels of water placed over the tubs 4. Wolpert's revolving wheel increases the moisture but does not increase the heat 5. The Russian tea machine and the steam pulverizer (at present) do not increase the heat 6. Wet hand towels suspended in a room are insufficient to cool the air 7. Of all the methods tested, the most efficient seemed to be the use of a fan to circulate the air.	147	14	-1.571436592	0.487642916	67.45	8.45	8.69	10	7.65	0.11067	0.35616868	9.24315123

Van Middel	The History of Puerto Rico	The History of Puerto Rico	<a href="http://www.guten">http://www.guten</a>	gutenberg	1903	Info	mid	PD	Few islands of the extent of Puerto Rico are watered by streams. Since Puerto Rico and these other islands have come to the United States, everyone is anxious to learn something more about them. The best way to learn the geography of a country and the history of its people is to visit the country itself. That would be difficult for most of us. The next best way is to read books written by people who have visited the country. The island nearest us is Puerto Rico, the most eastern of the West Indies. We must find out something of the climate, however, before we can decide whether or not we should like to live there. In order to plan our route wisely, we must know something about the climate of Puerto Rico.	156	8	-1.558184293	0.498605455	62.31	9.41	9.54	10	7.34	0.19379	0.42543260	9.31361290		
6225	Marian Minnie	Gr	Little Journey to Puerto Rico	<a href="http://www.guten">http://www.guten</a>	gutenberg	1900	Info	mid	PD	Since Puerto Rico and these other islands have come to the United States, everyone is anxious to learn something more about them. The best way to learn the geography of a country and the history of its people is to visit the country itself. That would be difficult for most of us. The next best way is to read books written by people who have visited the country. The island nearest us is Puerto Rico, the most eastern of the West Indies. We must find out something of the climate, however, before we can decide whether or not we should like to live there. In order to plan our route wisely, we must know something about the climate of Puerto Rico.	181	11	-0.891914758	0.453828391	75.57	6.94	6.35	8	5.92	0.09936	0.45457853	20.9902585

										Carbohydrates are the main supply of energy for our body. Fats and oils are important for many body processes: <ul style="list-style-type: none"><li>• Fat protects and insulates your organs</li><li>• They help maintaining healthy hair and nails.</li><li>• Some vitamins can only be absorbed and transported via fats.</li><li>• Fats and oils also provide the body with energy.</li></ul> However, some fats are better than others and having too much of them can be bad for you. <ul style="list-style-type: none"><li>• vitamin A helps strengthen our immune system and is good for your skin.</li><li>• B vitamins help us process energy from food</li><li>• vitamin C helps to keep your skin and gums healthy and strong.</li><li>• vitamin D helps to build strong bones and teeth</li></ul>
